

I have attached a copy of the kindergarten survey that we used as well as the half sheet of paper that went out with the survey. Each of our 6 elementary schools had their own sheet developed with both the school's logo and the Launch Manistee logo to show the collaboration.

As I shared on our conference call, I met with each school's kindergarten teachers and/or principal (some of the meetings were together - some were separate) to get them to understand the purpose of our survey as well as their buy in, since they (the classroom teachers) were the ones who were gathering the surveys. And, of course, I also made contact with the building secretaries so they were in the loop as well.

Hope this information helps. Please feel free to contact me if you have any other questions.
